<https://yerayar.github.io>

Computer Engineering professional with experience in process automation and data processing using Python. I recently applied my skills to developing efficient solutions for data management and analysis, working with technologies such as Docker, Spring Boot, and SQL Server. I have participated in projects focused on workflow optimization, implementing scripts for task automation, and improving efficiency in information processing. I also have solid knowledge of programming languages such as Python, Java, C, and JavaScript, and a quick ability to adapt to new tools and methodologies.
